

Technical information - Fitting standard panels

1

Aquamura panels have an attractive, tough laminate surface, and are constructed from quality water resistant plywood.

2

For best results with Aquamura panels, start in corner and finish over doorway.

3

Glue down edge of panel and fix into corner profile.

4

Screw down length of grooved panel. Use appropriate plugs for concrete, brick or plaster.

5

Apply sealant in joint before fitting next panel.

6

Slide the panel into place.

7

Cut last panel of each wall to size. Glue edge, fit profile and swing into place.

8

Mark position of final piece symmetrically over doorway. Cut panels and fix. Glue and screw where heads will be hidden by door moulding or coving.

Fixing shower panels

Shower panels should be trimmed to the correct height and width and then installed resting on the shower tray, embedded in silicon.

Panels can be glued back to wall battens or glued directly onto a suitable wall. Aluminium internal corner jointers and end caps are recommended, with silicon applied into the extrusion.

Accessories

Aluminium jointing sections are available in 2500mm lengths in a variety of finishes: S.A.A., polished aluminium, black and white.

Features

A design-led selection of Continental laminate finishes

Easy to install - no wet trades

Cost-effective

Hard-wearing

Easily cleaned and maintained

Applications

Aquamura has been successfully installed in all of the following locations:

- Bathrooms

Fast food restaurants

Gymnasiums and Health Clubs

Pubs, Clubs and Bars

Hospitals and Health Centres

Shower cubicles

Heavy-traffic corridors
- Doctors' surgeries

Changing rooms

Reception areas

Schools

Retail areas

Leisure Centres

Kitchens

Specification

Core material	Birch plywood
Face material	High pressure decorative laminate
Reverse	Balancing laminate

Dimensions

Standard panel size	2400 x 590 x 11mm T&G	12kg
Shower panel size	2400 x 1200 x 11mm square cut	24kg
Shower panel special	2400 x 1200 x 11 mm T&G	24kg

Fire Performance

Aquamura complies with Class II surface spread of flame.

Cleaning and Maintenance

Wipe with a non-abrasive damp cloth and a mild spray detergent.

Warranty

Aquamura is guaranteed for 10 years if correctly fitted, thoroughly sealed and maintained.

Note: The colours reproduced in this brochure are as close as possible to the actual laminates. It is recommended that you obtain samples prior to final specification.

What is Aquamura?

Aquamura is a wall panelling system, made from WBP Birch plywood faced in a high-pressure decorative laminate. It is a simple, attractive and economical way to transform walls.

In a complete room installation, the tongued and grooved laminate-faced panels fit together quickly and effortlessly. The fixings are completely hidden.

Within a shower enclosure, full size boards clad each wall, minimising joints, for a hygienic solution, and no mouldy grout!
