

Natural wood grain composite decking offering maximum performance against stains and fading.

HD Deck Dual takes composite decking to the next level with its 'capped' design creating a protective layer that offers **maximum protection** against stains, fading and the elements for an extra long life.

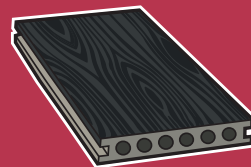

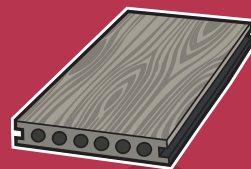

Stains - Red wine and even oil or grease can be washed off without leaving a mark.

Fading - The capped layer offers superior protection against the harmful effects of the sun.

DUAL-SIDED

HD Deck Dual is reversible and double sided, two colour options in one board!

Our advanced '**True Grain**' colour mixing technology gives HD Deck Dual a subtle natural depth of colour seen in natural timber.

HD DECK DUAL

The capped outer layer of *HD Deck Dual* features a contrasting colour on each side which allows your creativity to flow when it comes to designing your deck. Lay your deck with contrasting borders or flip over and change the colour for a fresh new look!

Get maximum protection against the effects of sunshine and weathering, which means less time maintaining and more time enjoying your deck.

Beautiful - *HD Deck Dual* is a product of great beauty. Whether you choose the traditional wood tones or the modern Carbon and Antique, the advance 'True Grain' colour mixing system gives each board a unique look and natural appearance with peace of mind it will last for years to come.

Extra Long Life - Expect *HD Deck Dual* to have increased durability over most other composite decks on the market. The fully capped layer can give a life expectancy of 25 years in residential use.

Fungus & rot free - Naturally resistant to fungus and mildew; the main causes of rotting and decay in traditional timber decking.

Very low maintenance - *HD Deck Dual* will maintain its good looks for years to come with no painting, sanding or oiling required.

HD Deck Dual is made of a wood plastic composite consisting of **FSC® 100% hardwood** and **recycled high density polyethylene**. The outer capping is made from a very durable **recycled plastic polymer** that features superior colour mixing to give *HD Deck Dual* its beautiful appearance.

Composite Prime

Board #1

Side A - Walnut

Side B - Oak

Board #2

Side A - Antique

Side B - Carbon
