

Arnold Laver

LaverTex.

Tough wear-resistant overlay plywood, for demanding applications.

SPECIALIST PLYWOOD PANELS FROM ARNOLD LAVER

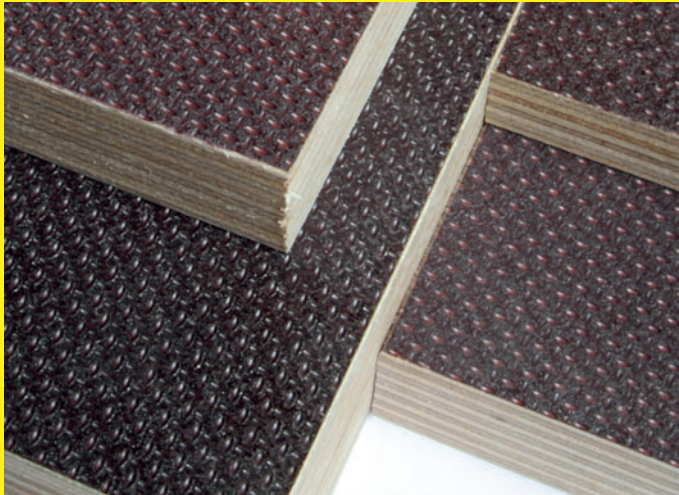

laver.co.uk

Hardwoods | Softwoods | Joinery Products | Sheet Materials | Cladding | Decorative Surfaces | Engineered Roof & Floor Systems

TexPly.

TexPly has a rough wire mesh overlay that withstands hard wear and tear. It's ideal for a variety of floor-panelling and other commercial applications.

HeksaPly.

Ideal for demanding high-wear applications. The face of HeksaPly has a special hexagonal surface pattern that delivers excellent slip-resistance.

Material

Birch plywood overlaid on both sides with a phenol film. The wear face has a rough textured pattern; the reverse normally is smooth although it also can have wire mesh pattern. All edges are sealed.

Advantages:

- High Wear Resistance
- Slip-Resistant Properties
- Environmentally Friendly – FSC certified
- Weather & Water-Resistant Surface
- Resistant to most commonly used chemicals
- Easy to clean
- Hygienic
- Easily machined with wood working tools

Applications:

- Vehicle floors | Ship and Barge decks
- Pedestrian bridges | Pier surfaces | Scaffolding
- Mezzanine floors | Stages
- Shop Fitting | Shelving
- Flight Cases | Work Benches

Technical

Dark Brown Phenol Film - Min 220g/m² Face.

Plywood Adhesive - Waterproof Phenol Formaldehyde Resin.

Bonding - EN 314/2 Class 3.

Conforms to - EN 636-2.

E1 Formaldehyde Emission Compliant.

TexPly - Panels available from stock
