

Arnold Laver

FIFTH EDITION

Under One Roof

Offering bespoke timber building solutions
to the House Build and Modular sectors

About Us

With 100+ years of timber knowledge and expertise behind us, we pride ourselves in being a leading timber materials supplier and a major force in the UK timber industry.

Our customers are the heart of our business, the key driving force behind everything we do. Our commitment to constantly reviewing our product offer, through continually evaluating new materials, is demonstrative of our assurance to supply excellence in quality, a fast turnaround and a service that's unrivalled anywhere in the UK.

This is made possible by our large, well-stocked and strategically located network of 18 Depots and 3 manufacturing and processing facilities which are all supported by experienced technical sales, procurement and quality management teams; with the primary aim to provide the best timber and timber-based products to our customers.

VISION

To help our customers to build well, using sustainable materials.

MISSION

To be the first-choice supplier for certified timber and timber-based products in the UK by making it easy for our customers to trade with us.

VALUES

We aim to stay at the forefront of our industry, by delivering both quality and innovation through our products and services, through our group manufacturing facilities.

We are part of National Timber Group, the largest independent added-value timber and distribution business in the UK, with more than 55 sites and a combined revenue in excess of £250M.

GROUP CAPABILITIES

- UK-wide coverage via 55 sites
- Circa 1,300 Staff across all sites
- Extremely strong regional and national brands
- Deep Industry knowledge and experience
- Provide a broad range of high-quality products on short lead times, supported by comprehensive timber knowledge and expertise

SPECIALIST MANUFACTURING DIVISIONS

A leading provider of fire and acoustic doors, doorsets and glazing screens for the commercial, residential & leisure markets.

A specialist engineered wood products division, offering a wide range of floor, wall and roof products - designed, engineered and fabricated.

NATIONAL TIMBER GROUP BRANCH NETWORK INCLUDES

Largest independent timber importers in the North East servicing construction companies, house builders / developers, self-build and DIY enthusiasts.

An importer, manufacturer and distributor of timber, sheet materials and joinery products with manufacturing capabilities and a network of branches across Scotland.

Roofing, insulation and building materials specialist offering roof tiles, slates, ventilation and flat roofing products.

Importers of timber, joinery and sheet materials across Scotland. With dedicated sawmilling / manufacturing capabilities, supported by a network of 10 branches

Our Products & Services

Our Products & Services

Whether you are a site developer or a national housebuilder, our highly experienced and skilled team of designers, engineers and fabricators can help you deliver your projects on time and on budget, without compromising on quality and performance.

OUR OFFER

- We offer a great range of high-quality products, backed by expertise, and a stringent quality control service that is second to none.
- With thousands of lines ex-stock, including a broad range of enhanced, up-to-the-minute timber products, we can offer next day delivery, direct to site.
- We work closely with our customers, to schedule deliveries in line with each stage of the their build programme.
- All this is backed by additional associated services, such as, timber treatment, laminate fabrication, routing, panel cutting and machining.
- Our engineered timber products save build time on site, improve thermal values and reduce health and safety risk for all methods of modern construction.
- Offering only reliable & trusted lead-times.
- Fully Certified materials performing to UKCA, UK(NI)CE & CE Standards (UKCA for UK, UK(NI)CE for NI and CE required EU & NI).
- Fully Certified materials sourced from responsibly managed forests and carry PEFC and FSC® certification.

DEDICATED ACCOUNT MANAGEMENT

We have a team of regional account managers to ensure each of our customers' are looked after.

Our account management team are dedicated to ensuring they help you from the project planning and implementation phases, right through to completion.

EXPERTS IN PLOTTED HOUSE PACKS

We have become experts in the supply of “plotted” housepacks in line with your own specific requirements, timescales and building programmes. Our team of experts will help to;

- Reduce on-site materials damage.
- We'll deliver; what you want, when you want, “Just In Time”.
- Product and design advice.
- Offering experience & expertise.
- Complete design, fabrication & delivery service.
- Quick turnaround from design to delivery.
- Large team of experienced truss and press fabricators.
- State of the art cutting and pressing machinery.
- Full technical & engineering support.
- We have a strong supply chain network offering stability and continuity of supply to our customers according to their build times.

OUR SECTORS

Our strength and industry knowledge comes from over 100 years' experience in working with a varied customer base including joiners, regional housebuilders, commercial companies, architects, specifiers, modular build developers and infrastructure project specialists.

As a supplier specialising in timber, sheet materials and joinery products, with substantial warehousing, processing and distribution capabilities, we are able to provide a broad range of high quality products on short lead times, supported by comprehensive timber knowledge and expertise.

Roof Trusses & Ancillary Items

Roof Trusses & Ancillary Items

Our impressive roofing solutions division offers all types of roof trusses from finks and attic trusses to complex roof trusses and spandrel panels.

ROOF TRUSSES

We supply whole housing schemes, individual homes and commercial buildings such as care homes and utility buildings.

Using the very latest MiTek® software, which incorporates the new and innovative Pamir design package, our expert designers can design roof trusses to meet your exact requirements. Our fleet of dedicated roof truss wagons makes reliable deliveries across the UK.

SPANDREL PANELS

Our expert team design and manufacture spandrel panels for both gable and party walls which can be used for timber frame and masonry construction and are simple to install with no complex anchorage needed.

Spandrel panels offer a significant increase to the speed of build on site and significantly reduce the length of time at which multiple tradesmen are working at height.

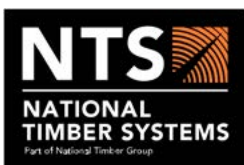

Our dedicated team design each project to comply with your fire, sound and structural requirements to meet approved regulations.

NYTROOF RAPID FIT SYSTEM

The NYTROOF RAPID FIT SYSTEM is far more efficient than other roofing solutions. Working in conjunction with specialist regional fitting teams, up to four roofs can be comfortably fitted in one day, dramatically increasing the speed of build.

Once delivered to your site the component panels can be craned into position straight away. This eliminates the handling and management of multiple products and trades on site, reducing labour costs.

Our dedicated NYTROOF team provide exceptional support throughout the design, fabrication and install process including site visits, detailed packs and technical support. We are working closely with national housebuilders to create solutions for all house types.

Roof Trusses & Ancillary Items

PRE-INSULATED WALL PANELS

Our pre-insulated wall panels offer significant benefits for timber frame construction and they are an effective alternative to steel and masonry wall structures.

With high thermal qualities compared to masonry infill walls, they can be engineered to provide additional structural capability.

Factory manufacture ensures a higher level of dimensional accuracy than work on site, whilst increasing the speed of build and reducing on site labour costs. Additionally, once craned into position they can be clad with brick or timber cladding as part of the building process.

ROOF AND FLOOR CASSETTES

Our roof and floor cassettes are constructed using STEICO I-Joists with in-built lifting straps for easy transportation, offload and installation.

We manufacture both roof and floor cassettes which are ideal for faster build timber frame. The roof cassettes are pre-insulated to achieve impressive thermal values as low as 0.09w/m²k.

They are fitted with a peel away cover for transportation and protection on site and are supplied up to 14 metres long in a range of depths from 253mm to 483mm..

Roof windows

Roof Windows

Roof windows with a superior specification.

Fakro roof windows are made from slow growing, close-grain pine which is guaranteed to be knot-free and of the highest quality. With their handle at the base of the frame, windows provide up to an 8% greater glazing area, letting more light into a room and making windows easier to open. Fakro windows are available in all the sizes you would expect, even in conservation style, and have a range of flashings for all well known tiles and slates.

FAKRO offers two versions of roof windows developed specifically for rooms in which high levels of humidity are expected. FAKRO customers have the choice of either white polyurethane coated pine or PVC (in perfect white), finishes.

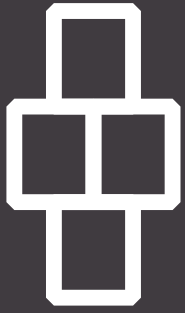

Fakro - a genuine alternative when choosing roof windows

BENEFITS OF FAKRO ROOF WINDOWS:

- topSafe® anti-burglary reinforcement.
- Automatic V40P vent as standard.
- All FAKRO standard centre pivot and top hung windows are fully BBA accredited.
- FAKRO quadruple glazed FTT U8 Thermo has a single glazing unit area and a U-value of 0.58W/m2K which is one of the market leaders.
- Whether you're looking for natural pine, acrylic coated pine, PU-coated pine or PVC, FAKRO offers a 10-year warranty for all windows and a 20-year warranty on glazing units.
- The easy to use "bracket fix" installation system enables windows to be fitted either to rafters or battens, a helpful benefit to installers.

Available from our extensive branch network.

Flooring systems

Flooring Systems

ENGINEERED JOISTS

Engineered joists span longer lengths and are lighter in weight than traditional joists. They also reduce movement and shrinkage in new housing due to their drier, engineered properties.

We use STEICO engineered joists for our flooring design solutions for whole housing schemes, individual houses and commercial buildings such as care homes and utility buildings.

Together with our roof trusses, we can provide full floor and roof packages too. Our engineered joists can be supplied with peel clean covers.

EGGER ADVANCED STRUCTURAL FLOORING BOARDS

EGGER PEEL CLEAN XTRA

A P5 grade chipboard covered with an easy-to-peel, anti-slip polyethylene film. The recyclable, peel-away film helps to prevent moisture ingress and provides an additional moisture barrier upon completion of the floor.

Once fully fitted, can be exposed for up to 42 days.

EGGER PROTECT

Durable, anti-slip weather resistant surface layer bonded to both sides of the board for protection against moisture ingress for the life of the floor. A unique, anti-slip surface, even when wet, contributing to site safety.

Once fully fitted, can be exposed for up to 60 days.

EGGER JOINT & JOIST ADHESIVE

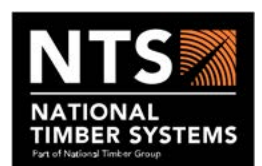

A unique foaming action, ideal for gap filling on uneven surfaces and joists. Five times stronger than mechanical fixings.

Helps minimise squeaks associated with fully nailed floors. No need for joint sealing tape to cover board joints.

EGGER ADVANCED LIFETIME GUARANTEE

Our EGGER Advanced Lifetime Guarantee covers the structural performance of your finished floor. Simply follow the three steps of the EGGER Advanced Structural Flooring System to benefit.

1. Select a board from the EGGER Advanced range
2. Use EGGER Joint & Joist Adhesive
3. Fit to the EGGER Advanced Structural Flooring Fitting Guide

Staircases

Staircases

A staircase is often the first thing visitors see when entering a property, so why not make it a show stopper, as well as a structural feature? Whether you're undertaking a new build or refurbishment project, our wide staircase range is guaranteed to meet your needs.

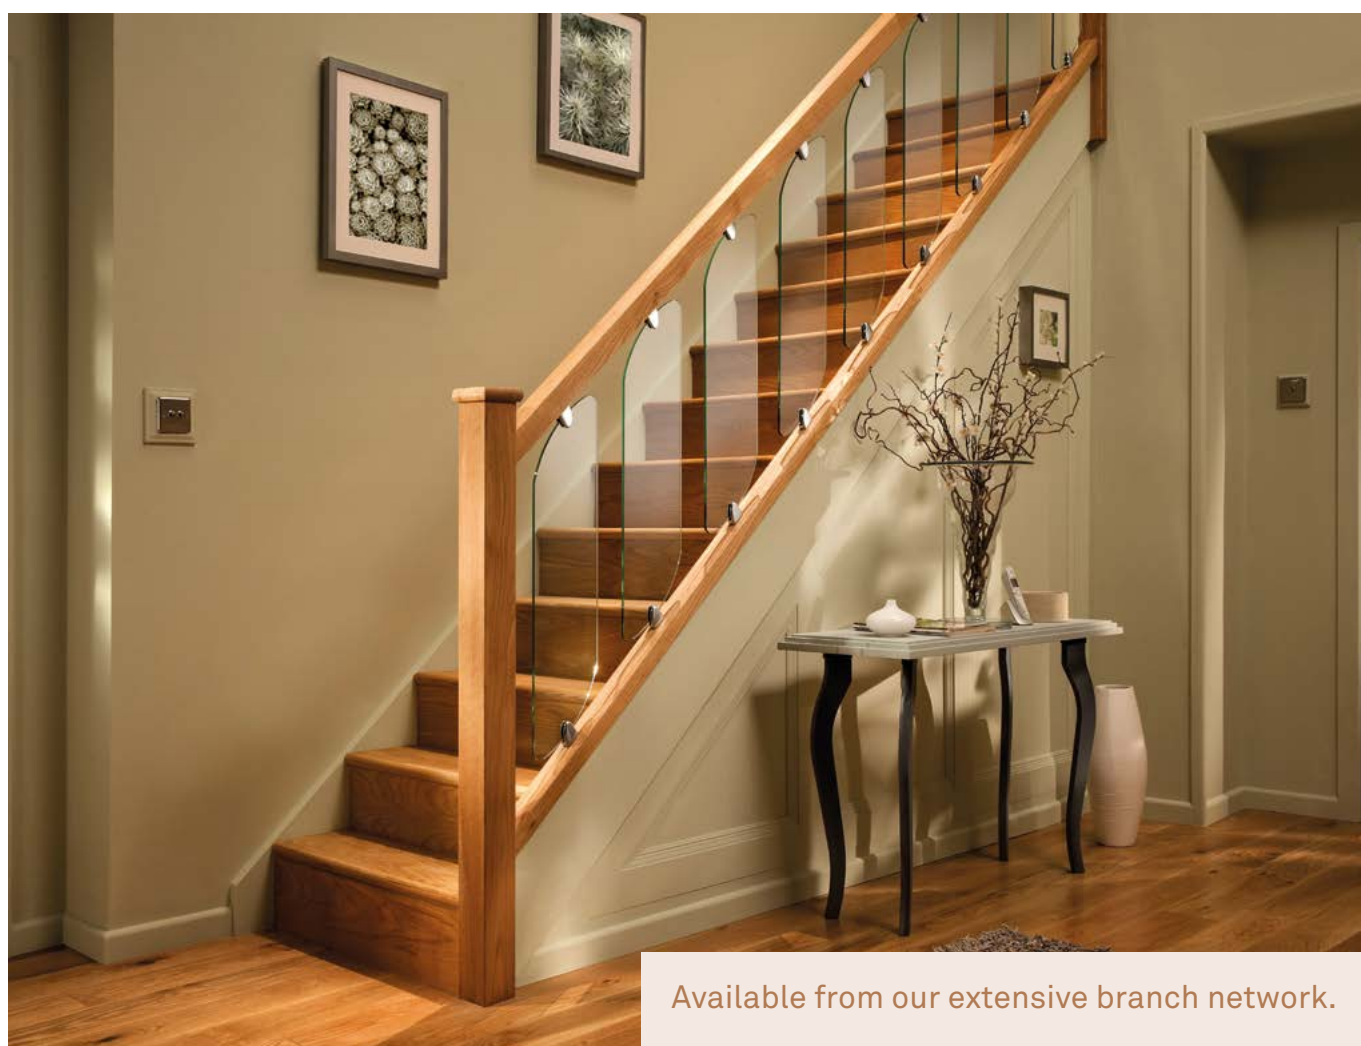

Our range of JELD-WEN staircases offers a complete solution for residential staircases, plus we can supply communal stairs for flats or multi-occupancy buildings, with a range that is proven to meet the most exacting performance standards including fire-protected timber stairs.

If you want an ultra-modern look, add a touch of metal or glass from our Contemporary range, or invest in the Prestige oak and redwood range for a grand entrance.

We also have great value style flights in our Traditional range that you can order in primed softwood, hemlock and redwood finishes.

Adding or replacing stairs couldn't be easier when you choose Arnold Laver. We work in partnership with JELD-WEN, the country's largest volume stair manufacturer.

Due to their size and experience, handling anything from a standard stock flight to a premium staircase built to a unique specification comes with no fuss and no effort required on your part.

Available from our extensive branch network.

Internal Doors

Internal Doorkit Solutions

Our Doorkits are designed with ease in mind and delivered to site, pre-machined for an accurate fit and to allow for a simple, quick and trouble-free installation.

Our Doorkits are ideal for new build properties and, unlike traditionally hung doors, they have all the essential components required for immediate installation. They are pre-machined for an accurate fit, minimising the dependence for on-site skills, thus saving valuable time.

Doorkits can also be handed on site so no pre-order handing information is required. As doors are fully finished, the leaves can be installed at the end of the building process, eliminating swelling and distortion.

BENEFITS OF USING DOORKITS IN NEWBUILD PROPERTY DEVELOPMENTS:

- A broad range of moulded designs (other styles available – POA).
- Standard sizes available on a short lead-time.
- Quality manufactured door-linings, designed to complement the door.
- Quick-fix door hinges - available in chrome.
- Mortice Bathroom Lock provided as standard.
- Accredited by the BWF Certifire Fire Door Scheme .
- Pre-machined for ironmongery, where required.
- The material used in our doorkits is FSC® or PEFC certified, assuring you that our products are sustainably sourced.

Internal Doorsets

Our doors are designed specifically for internal residential applications, and are a cost effective solution for fitting a door and frame as quickly and easily as possible.

The doorsets are available as single doorsets or as doorset pairs, with a wide variety of door styles to choose from.

Supplied pre-hung, with architraves, hinges, latch or lock, door linings and door stops – our doorsets are a smart solution designed to save time and cost whilst delivering optimum product quality.

Internal fire doorsets options are also available with FD30 as standard and FD60 fire rating to order.

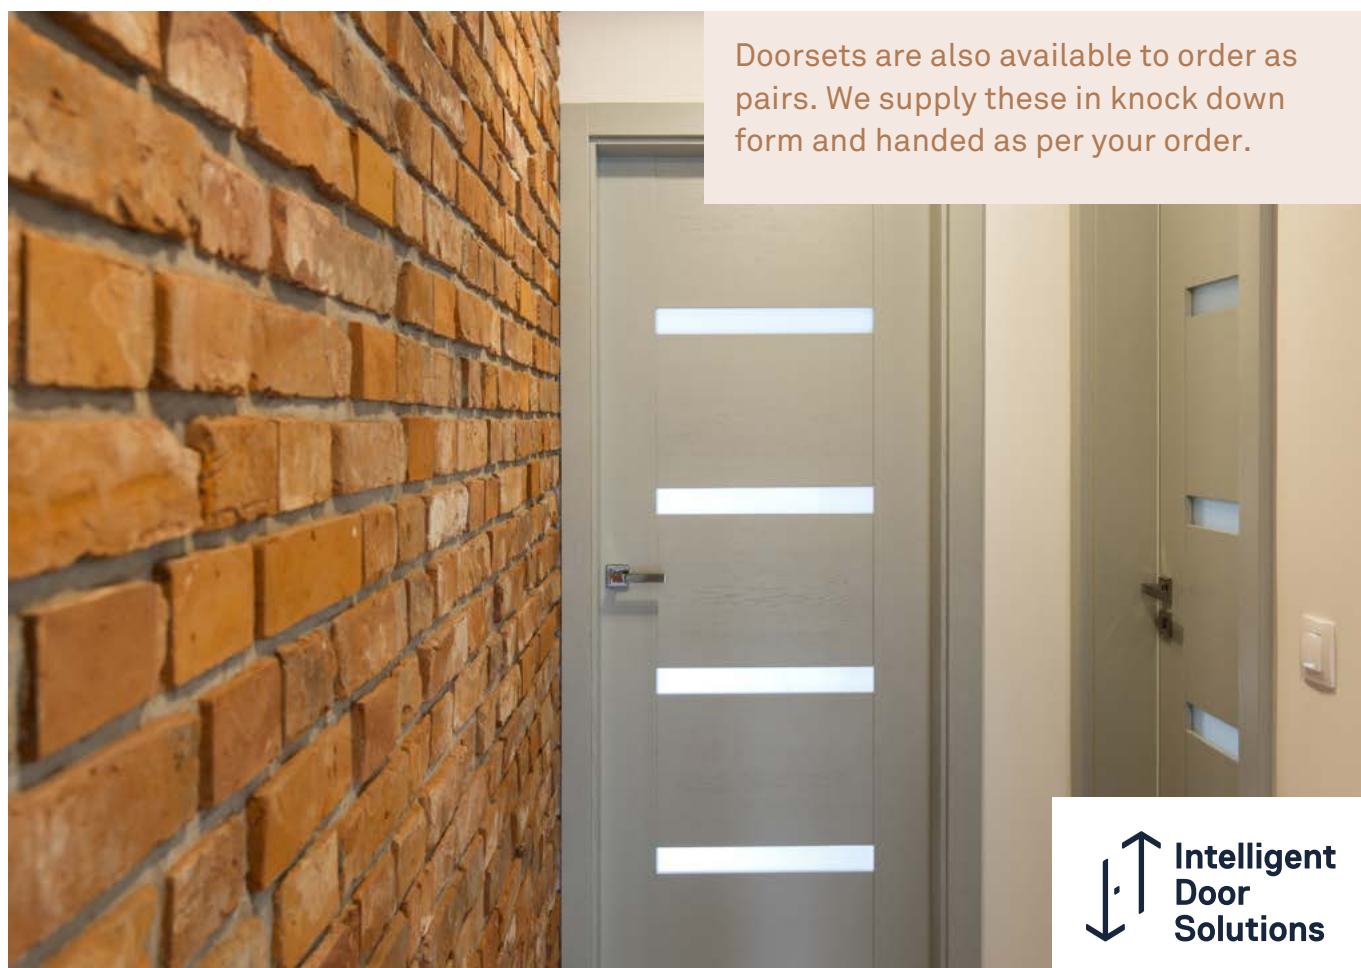

STANDARD DOORSETS: MDF LINING

- Solid reliable fixing system through the lining into the core of the wall

- Architrave tongue is self-adjusting to accommodate minor inaccuracies in partition widths
- Interlocking mechanical joints for a tight, accurate fit of the architrave
- MDF moisture resistant foil wrapped linings, stops and architraves – pre-machined ready for installation

FIRE DOORSETS: MDF LINING OR HARDWOOD FRAMES

- Available as FD30, 30 minute fire rating using MDF linings. FD60, 60 minute fire rating doorsets are available in hardwood door frames only
- Available with standard intumescent strips only, or both intumescent and smoke seals fitted to the head and jambs of the lining or door frame. Supplied in either white or brown

Doorsets are also available to order as pairs. We supply these in knock down form and handed as per your order.

Bespoke Doorset Solutions

Our bespoke doorset manufacturing capabilities provide design, manufacture and technical support on every aspect of door provision. The entire process is carefully controlled and monitored; from selecting raw materials, to precision machining and prompt delivery anywhere in the UK.

Whether you need enhanced acoustic ratings or high-quality fire door sets; our door set range offers exceptional sound and fire proofing properties to fit any project perfectly.

FIRE RATED DOORSETS

Offering fire rated door sets from FD30 to FD120 with the capability of being a smoke controlled or self-closing door.

ACOUSTIC RATINGS

We can offer a performance range of door sets with some of the thinnest door leaf's available - with a choice of ratings from 29 Rw dB to 55 Rw dB, to match any requirement.

SECURE BY DESIGN

We manufacture Secured by Design (SBD) door sets; built to 'design out crime' and are UKAS tested to meet improved safety standards, focusing on crime prevention of homes and promoting the use of security standards for a wide range of applications such as entrance doors in apartments and other multi-occupancy dwellings.

GLAZING PANELS

We produce glazing panels, to match your door sets and the design layout. We can offer clear, obscure and manifestation designs of glass for fire and non-fire glazed doors.

FRAMES & LININGS

We give as much importance to our range of frames as we do our doors to ensure the door set will meet the relevant performance standards.

The frame material will vary depending on what level of fire protection is required but our technical team will work with you to ensure the correct frames are specified for the required application.

We offer a range of door linings and rebated frame sizes which make up the frame kit, with 30 and 60 minute fire protection options to meet UK standards.

INTUMESCENT SEALS

To achieve excellent safety and acoustic performance, we utilise some of the best performing seals and ironmongery in the market.

All our seals are sourced from reputable, industry-leading organisations who produce the highest quality sealing systems that incorporate acoustic, smoke, fire and thermal containment, as well as accessibility.

HARDWARE

We offer a wide range of high-grade hardware for doors and windows. Whether you're looking for beautiful and durable door hardware for living-rooms, bedrooms, bathrooms, or kitchens, we are here to provide you with the best solutions.

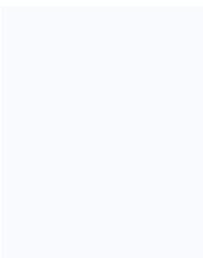

Finishing Touches

We know that as well as giving exceptional performance, a doors' appearance is intrinsic to the overall interior design of a space. Which is why we know it is important to give our customers choice in delivering those final touches such as choosing the laminate or veneer used on their doors.

These are some of the most popular colours but others are available so please get in touch if you can't find what you are looking for.

Ancillary items

Timber & MDF Mouldings

SOFTWOOD AND HARDWOOD

Our broad range of Softwood and Hardwood mouldings are manufactured in our own modern mills, where we use state of the art technology and machinery.

We have over 120 standard profiles available from stock including:

- Skirting Plinth
- Architraves
- Door Casings
- Linings
- Window Board
- Dado Rails
- Hand Rails
- Beading

MDF

We offer a core range of over 160 profiles, the majority of which are available ex-stock.

All profiles are 'twice primed', whilst the MDF used in the production of our mouldings is FSC certified.

PROFILES AVAILABLE INCLUDE:

- Chamfered and Rounded
- Ogee
- Lambs Tongue
- Dado
- Door Stop
- Ovolo
- Rounded One Edge
- Door Linings
- Casings
- Window Board

Oak Veneered MDF mouldings further expand our product offer and can be delivered on a short lead-time. Whilst finishes in Ash, Cherry, Beech and Walnut are all available to order.

We also offer a customised machining facility, which allows the production of bespoke mouldings to almost any requirement.

Available from our extensive branch network.

Cladding

Cladding

We offer a single source solution for all your cladding requirements. Ranging from advice on materials and designs through to installation, coating applications and planned maintenance.

LARCH

Larch is the perfect cladding material for high-impact commercial and public area where durable, attractive product is required. We offer both Siberian and European grades of Larch.

WESTERN RED CEDAR

With its unique range of properties including workability, performance, versatility and weather resistant characteristics, Canadian Western Red Cedar has become the number one choice in cladding, for architects and specifiers. Western Red Cedar dampens sound vibrations and has superior thermal insulation properties.

ACCOYA® WOOD

Accoya is a 'modified wood species' whose performance credentials achieving Class 1 durability, dimensional stability, resistance to mould and insects and ease in machining - with a life expectancy externally of 50 to 60 years unprotected with surface coatings.

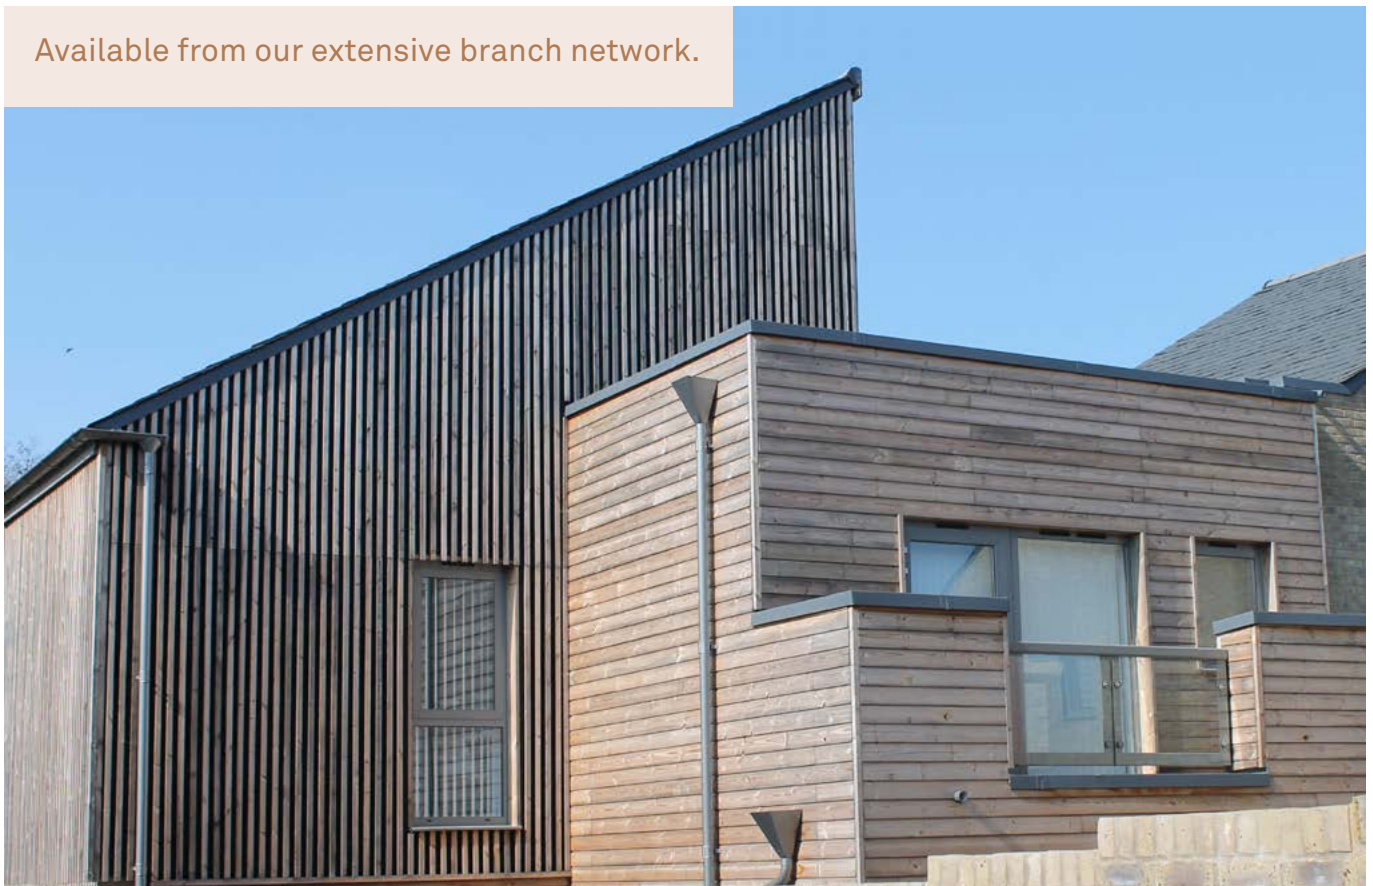

OAK

Our Oak Cladding is golden brown to almost yellow in appearance with a straight grain. It finishes well and ages to a silvery grey finish if left un-protected. A versatile material that is popular with architects and specifiers. It is durable and hard-wearing.

THERMOWOOD®

Thermowood® is a physically engineered timber that is produced by specialist heat treated Scandinavian Redwood / Whitewood. It is this alteration in structure that results in a more stable, anti-fungal timber ideal for use in exterior applications.

Available from our extensive branch network.

Cladding

HARDWOOD

We offer various durable species of hardwood suitable for cladding, including Cumaru, Red Louro and Ipe, which are also available as FSC® Certified.

VIVIX® (COMPOSITE)

VIVIX® is a lightweight ventilated rainscreen cladding solution which combines excellent weather and UV resistance properties for enhanced durability and ease of maintenance.

SOFTWOOD

We offer a premium range of Redwood cladding which is lightweight and easy to install and ideal for internal and external applications. Our range includes, Sawn, Treated (preservative or fire retardant), coated or stained.

HD CLAD PRO

HD Clad Pro™ a low maintenance, durable alternative to traditional timber cladding that is available in a range of natural colours. The invisible clip fixings and trims allow for an uncomplicated installation which will transform the exterior of residential and commercial properties alike.

HD Clad Pro™ composite cladding exclusively uses FSC® 100% certified hardwood flour and recycled plastic which combine to produce a high quality product that outperforms traditional timber.

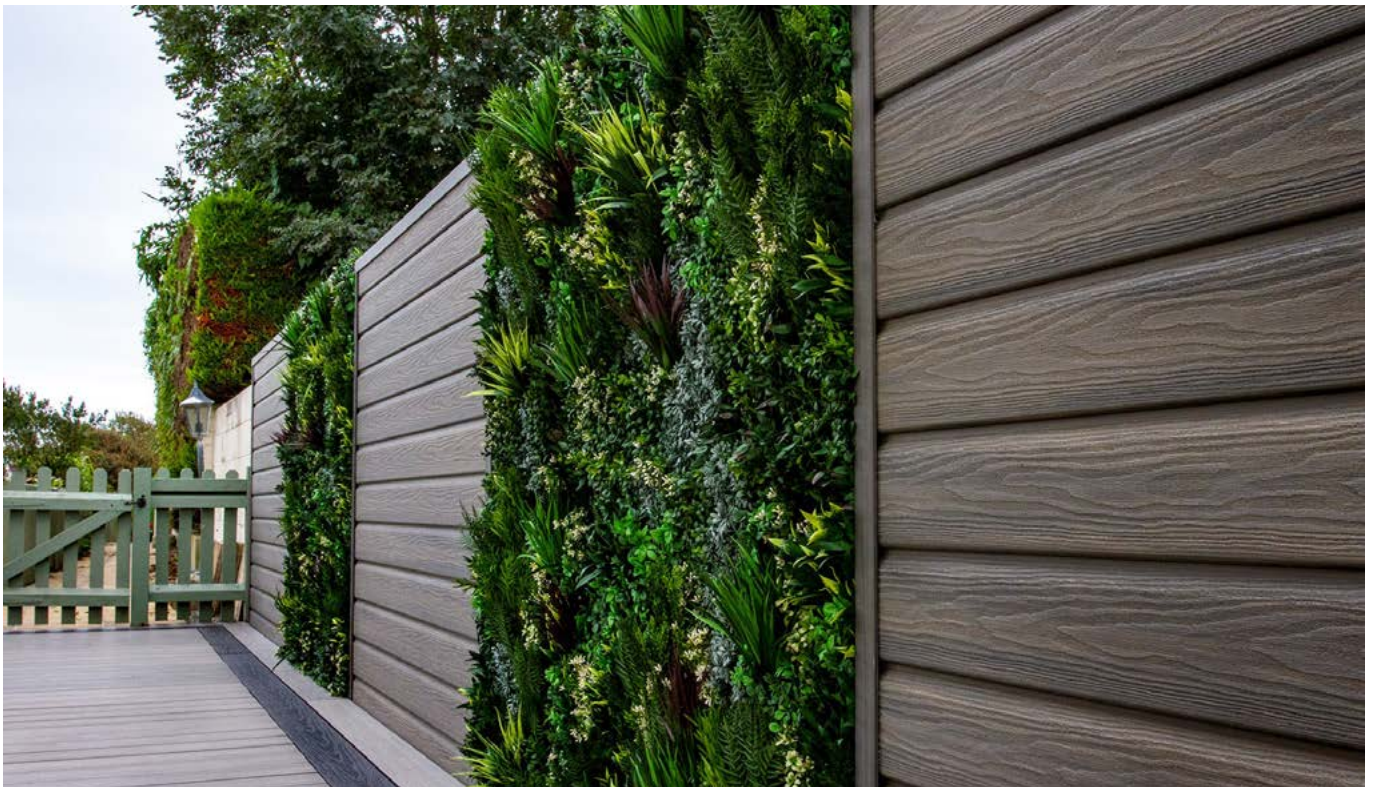

CLADDING PROFILES

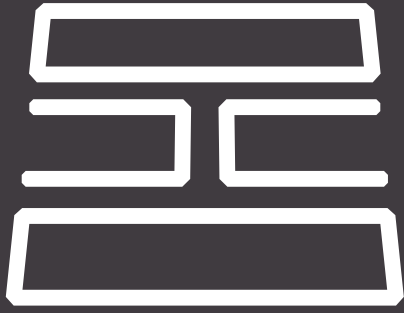

We produce a range of standard and bespoke profiles to suit all applications and can offer expert advice to ensure that the most appropriate product is specified for each project.

CLADDING TREATMENTS

Our timber cladding-related services include:

- Kilning - to provide the optimum consistency and performance.
- Machining - we can machine to bespoke patterns to suit your requirements.
- Fire Treatment - industrial pre-treatments to both cladding and sub-strates, that comply with any specification.
- Premium factory applied exterior coatings, to
- Cedar Shingles - ideal for cladding the roof and side of buildings, such as sheds, garages and summer-houses.

Flooring

Touchstone Flooring

Touchstone Flooring™ is a luxury interior flooring system with a textured 3D surface that gives the look and feel of natural wood but without any of the disadvantages of solid or engineered wood floorings.

Suitable for use throughout your home, Touchstone Flooring™ is waterproof, resistant to indentation and colour stable. The boards feature an acoustic foam underlay to absorb and suppress household sounds, making it the ideal application for your bathroom, kitchen and living areas.

The patented one piece drop-lock installation system eliminates the need for specialist tools, allowing an easier and faster installation.

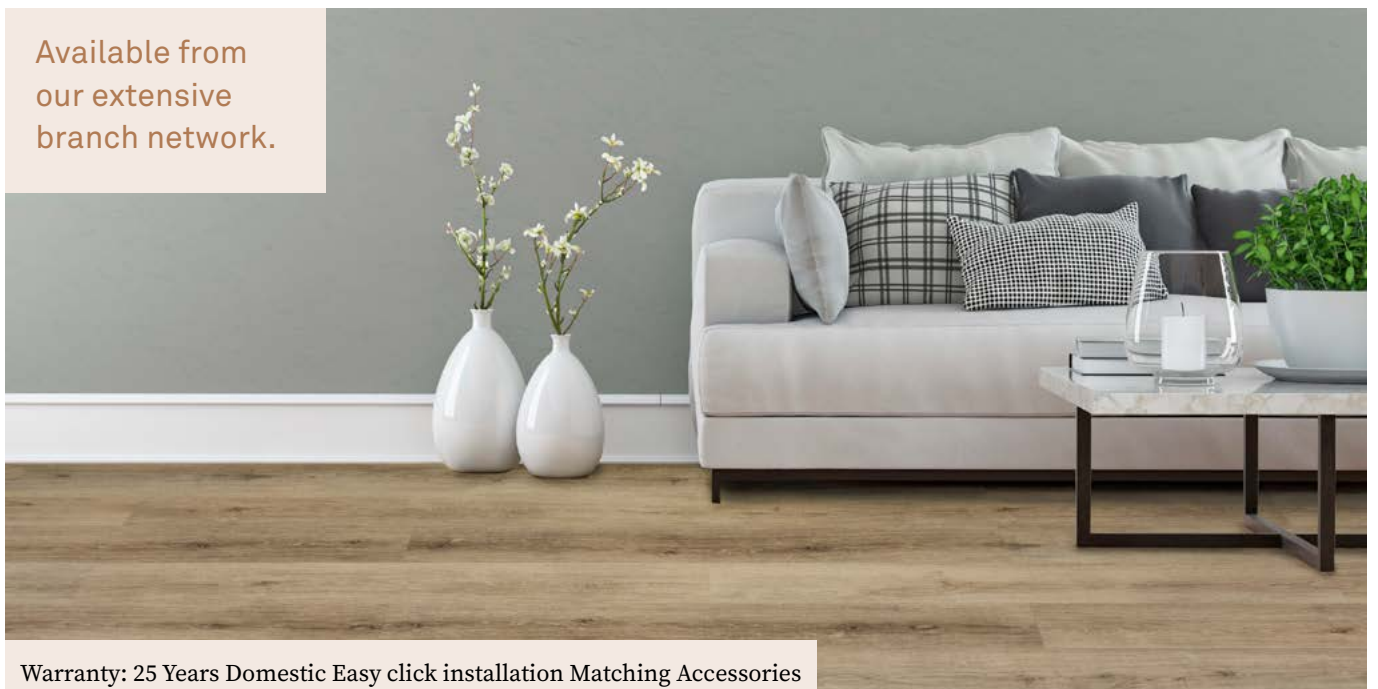

Matching trims and skirting are also available to give your project a quality finish.

Touchstone flooring offers:

- A range of woodgrain and stone finish options
- Quick and smooth installation
- Compatible with underfloor heating
- Domestic and commercial use (Class 33)
- Colour fast (Grade 6)
- Realistic wood grains

Available from
our extensive
branch network.

Warranty: 25 Years Domestic Easy click installation Matching Accessories

Elka Engineered

The Elka Engineered flooring range has all the aesthetics of a real wood floor but without any of the restrictions bringing the very essence of nature into your home.

Each floor board is unique, enriched with naturally occurring characteristics.

Elka Engineered is a truly practical product range, chosen for its strength, flexibility of installation and overall stability.

The simplicity of its construction makes it perfect for use in DIY projects and thanks to its strength, it can easily be installed as a floating floor.

Elka offers board widths and thicknesses from 12.5mm up to a structural board of 20mm thick. All floors are pre-finished and available in a number of Lacquered, Brushed & Oiled, Brushed Matt Lacquered and Smoked & Fumed finishes.

Available in a Tongue & Groove system or the patented Uniclic Locking System which is a totally glueless process ensuring a seamless joint.

All Elka Engineered floors can be sanded and refinished.
Warranty: 25 Years Domestic

Quick-Step Laminate

A beautiful interior starts with a good foundation and Quick-Step Laminate floors are designed to last a lifetime.

Whatever your style, whatever your room, Quick-Step has the perfect floor for you.

Warranty: 25 Years Domestic
Uniclic Joint Warranty: Lifetime
100% Matching Accessories

Quick-Step takes Laminate flooring to the next level with cutting edge design and technology offering excellent protection against scratches, stains and surface moisture.

Whether you like modern or traditional, Quick-Step offers a wide choice of plank sizes, various types of design, a myriad of colours and many textures and finishes.

With beauty in every detail and ease of cleaning and maintenance, Quick-Step offers a total solution for every room in your house.

Quick-Step's HydroSeal technology offers a water-repellant coating to Laminate flooring that is suitable for use in bathrooms.

Uniclic Locking System for easy installation, even in tight corners and under radiators.

Available from our extensive branch network.

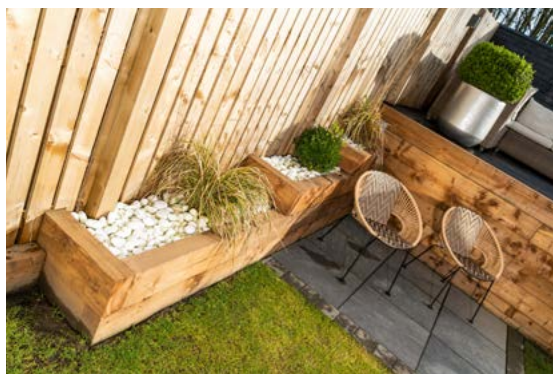

Landscaping

Landscaping

We offer a comprehensive range of landscaping and garden products to help you create the perfect landscape in any garden project.

Available from our extensive branch network.

DECKING

We stock a range of lengths, thicknesses and profiles to match any requirements. We can offer from stock:

- Composite decking.
- Hardwood & Softwood timber decking.
- Anti-slip decking.
- Balustrades.

FENCING

We stock reliably built garden fencing that have been fully treated for ultimate durability and are suitable for all garden projects due to their densely packed boards which can be fitted into existing frameworks.

- Wide range of fencing including dB Fence acoustic barrier fencing system.
- Gravel Boards.
- Feather Edge Boards.
- Fence Rails.
- UC3 Standard & UC4 Incised Fence Posts in various colours and sizes.
- Fast Set Posts Mix.
- Panels.

SLEEPERS

Our sleepers have endless garden or leisure applications. They can be used as boundaries, edgings and planters as well as distinctive raised beds and borders, decks, terraces and walkways.

- Softwood Sleepers.
- Tanalith Treated Sleepers.
- Oak Sleepers.
- Incised UC4 Long-life Sleepers.

GARDEN BUILDINGS & FURNITURE

We stock a wide variety of garden sheds, green houses, furniture and log cabins that are available in many sizes to suit your needs. Many of our products are manufactured from FSC certified timber from sustainable sources.

- Sheds & Log Cabins.
- Summerhouses & Greenhouses.
- Garden Furniture.
- Troughs & Planters.

Finishing

Finishing touches

TIMBER FINISHING AND TREATMENT

Finishing timber is a key part of the manufacturing process; the key to ensuring timber performs and is long-lasting for both exterior and interior applications, is selecting the optimum coating system for the end-use.

We offer a range of factory-applied finishes from industry leading coating manufacturers which allows us to offer tailored solutions, meeting customer-specific requirements resulting in installation, finishing time and cost to be significantly reduced. Timber machining.

These include; interior priming, exterior wood stains, interior lacquer, exterior base-coat / top-coat, preservative treatments and FR treatments.

PANEL AND COMPONENT MANUFACTURING

Our dedicated group production facilities can manufacture bespoke panels and components for a wide variety of applications. Together with our extensive range of decorative surface and sheet materials, our panel and fabrication facilities offers you unlimited choice and opportunities.

We can manufacture almost anything from door sets to bespoke wall panelling, vanity units, cubicles, worktops, unit components and frontals.

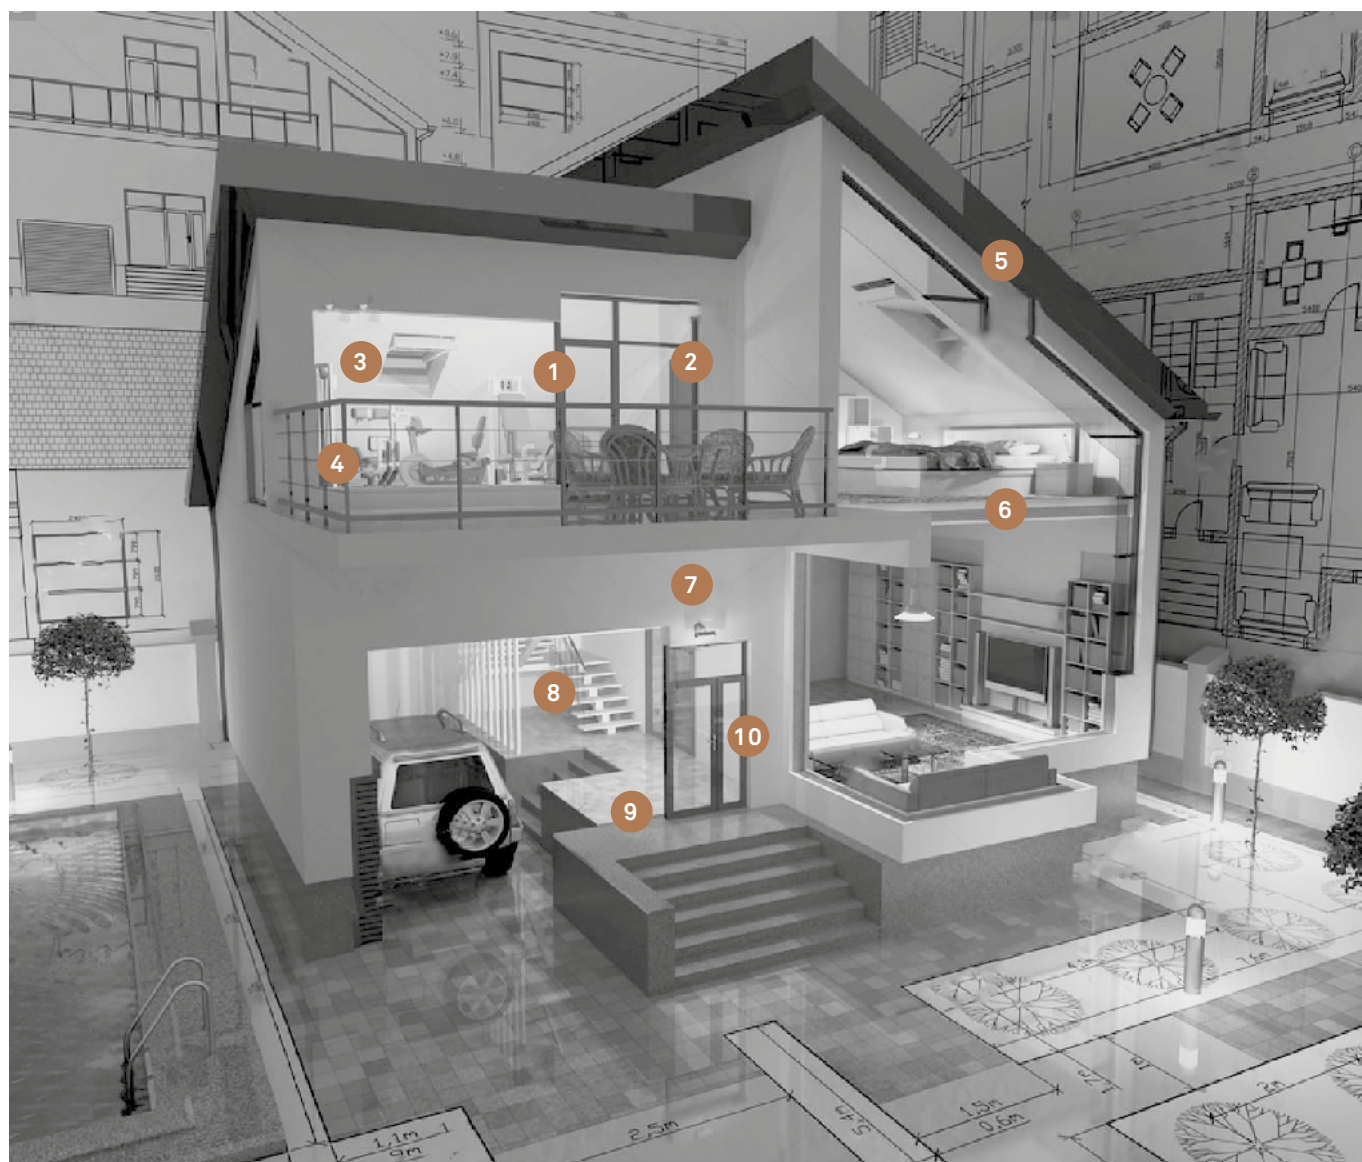

Our bespoke manufacturing capabilities allow us to focus on our customers' requirements and recognise that flexibility, reliability and attention to detail are key in delivering results.

Available from our extensive branch network.

Sustainable and certified

We are committed to protecting the environment. Our policy is to continually improve our environmental performance, preventing pollution and minimising the impact of our operations.

We also strive to meet and where possible exceed the applicable environmental legislation. We strongly believe that it is our corporate and social responsibility to help preserve the world forests and promote effective forestry management.

SUSTAINABLE SOURCING

We hold both FSC® and PEFC™ Certification and are able to consistently provide goods from legal and sustainable sources. All our branches have Chain of Custody implemented, independently evaluated and certified to provide our customers with environmental assurances.

Our certified timber products meet the UK Government CPET approved timber procurement policy. As a member of the Timber Trade Federation we are committed to responsible sourcing and only offer fully certified timber either PEFC or FSC® Certified.
